

Fluid HC-10 | HC-20 | HC-30 Anti-Set-Off Powder

Coated organic anti set-off powder

Product Usage

Fluid HC10: for light paper up to ca. 120g/m²

Fluid HC20: for paper and light carton ca. 80 - 250 g/m² (universal application)

Fluid HC30: for carton from ca. 250 g/m²

Features and Benefits

- Coated surface: water-repellent powder (hydrophobic) - no agglomeration
- The powder particles have a round surface, therefore no scouring
no abrasive effect on the image areas
- can be used in all powder application systems
- The ink absorbs the particles
gloss of the ink remains
- Based on natural raw materials
recommended for food packaging printers
- Excellent flowing characteristics
- Recommended for Inline varnishing with water-based coatings

Directions

Adjust carefully the amount of powdering and reduce to the minimum.
